

FAUNA RESEARCH INC.

Notes from the Field

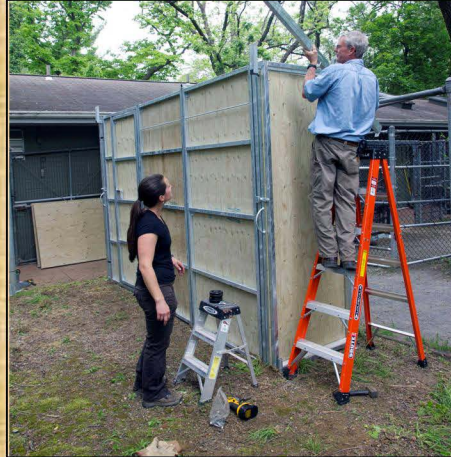

LOCATION: Northeast Zoos and Game Parks

DATE: September 2016

EQUIPMENT: TAMER Jr.® sorting alley, transport truck and trailer

Stackable panels and gates and the TAMER® are easily loaded and transported on a standard trailer.

Simple design allows for quick and easy set up in most locations.

NOTES: Jonathan Bergmann DVM, veterinarian for the Turtle Back Zoo and a consulting vet for many game parks and zoos, uses the portable TAMER® system on larger herds for annual exams, hoof trims, vaccinations, sorting individuals as well as loading and unloading animals. For all of these procedures SAFETY and EFFICIENCY are key! The TAMER® system saves time and money by providing a safe work environment and eliminating the need for chemical immobilizations and reducing capture related risks. A complete TAMER® system is easily transported via truck and trailer allowing for the management of animals at various and numerous locations.

Sorting alley leading up to the TAMER®

TAMER® Jr. is capable of handling a wide range of animals up to 250 lbs.

For more information about TAMER Jr.® and sorting alleys, contact:
 Mark MacNamara at (845) 758-2549,
 E-mail: faunaresearch@gmail.com
 On-line: www.faunaresearch.com

Portable catch pens can be set up just about anywhere animals roam.
