

The Fauna Small Animal & Bird Cages

DESIGN

Small Mammal Aviaries Enclosure

- Optional mesh floor to allow coarse gravel flooring.
- Self supporting structure, not requiring permanent installation.
- Versatile wire, mesh, or solid side panels available.
- Galvanized for long lasting durability.
- Free standing; no posts required.
- Versatile modular design.
- Variety of sizes and layouts.
- Optional feeding doors/shelves available.
- Designed to suit space requirements and handlers needs.

The Fauna Bovine handling systems

Crowd Tub

Non-slip stairs/
ladder

Swing door lock

Fauna chute, palpation cage and alley section

Fauna Manual Headgate

- Headgate automatically adjusts to size of animal for holding.
- Positive locking, quick release, straight through exit.
- Works with large, horned animals.
- Will handle the smallest calf to the largest bull.

Fauna Bison Chute

- Heavy, all steel construction.
- Both sides squeeze and adjust.
- Fully enclosed side access doors keep animals' head and legs inside.
- Left or right hand controls available.
- Scissor headgate with solid neck bars to hold head for treatments.

Options:

- Side release door.
- Crash cage (straight, slant front, or split door).

Fauna Crowd Tub

- The catwalk on the tub alley system allows you to work bison through the complete system without getting up or down. Available on operators side or around entire unit.
- The catwalk is 2' wide with a safety railing.
- Easy to access by non-slip stairs or ladder.
- Load-out doors in the tub system are an excellent optional feature.
- Swing door on the tub locks securely as you move livestock forward into the alley.

Fauna Alley Section & Palpation Door

- Alley and palpation door opens to eliminate problems when bison go down.
- Adjustable alley top prevents small animals from turning back.
- Solid sheet metal to full 84" height.
- The roller doors on the alley system all slide away from the catwalk and latch securely when closed, leaving the catwalk free of obstructions for the operator.
- Heavily constructed roller door moves easily on 5" nylon rollers.

FAUNA RESEARCH INC.

Fauna Research Inc. has been designing and building animal restraint equipment since 1984. This includes the TAMER™ series of equipment, portable management pens, box traps, and corral traps.

The TAMER™ series of equipment will help you manage your exotic herds of hoof stock and help you to get the most out of your management and breeding programs, all while saving you money. The TAMER™ offers a chemical free system to humanely manage and restrain hoof stock for health maintenance, shipping and testing, while providing a safer work environment for handlers and keepers. Portable corral traps and box traps are designed for capturing most hoof stock and are especially effective for trapping deer and antelope.

Zoo's and Game Parks using Tamer™ Equipment
