

FAUNA RESEARCH

Specialized Training and Enrichment Equipment from the Designers and Manufacturers of the Highest Quality Tamer Brand Animal Handling Facilities

Adjustable Height Hay/Grain Feeder

The feeder is raised and lowered with a manual, high tork, brank winch style hand or electric crank. The hay rack can hold up to 2 square bales or more, and the bin will hold up to 50 pounds of concentrated feed.

Portable Elevated Training Platform

The platform is multifunctional and can be used for hand feeding, training or observation. It can be located anywhere there are pen partitions. The lightweight, expanded metal platform is equipped with safety rails and chains as well as a built in access ladder.

Giraffe Puzzle Feeder/Activity Box

The puzzle feeder keeps giraffe active and engaged while highlighting their natural adaptation for browsing. The clear plexiglass back on the box allows guests to watch giraffes use their tongue to search for food.
